(Note: The dollar amounts shown above will be updated annually on October 1.)

**After** service has been provided to the client, follow these instructions. A separate tally sheet must be used for each type of service (HEAP W/P/O, ECIP W/P/O/ HCS, WX):

1. In the chart above, find the number of people that are in the client's household using the "Size of Family Unit" column.
2. Follow that line across to find the column that contains the correct range for the client's monthly gross income.
3. Note the poverty level identified at the top of that column.
4. Using the tally sheet below, mark the household once in the correct poverty level column.
5. A total of these households will be reported to CSD on the bimonthly reports.

For example: A client receives HEAP W/P/O service. There are three people in the family with a monthly gross income of \$1,385.00, which is in the 101% - 125% poverty level range. In the sample chart below, the household is shown as receiving service on 1/04/06 and is recorded in the 101% - 125% column. (See the checkmark highlighted with a square in the tally sheet below).
